REASONS FOR ALLOWANCE

1. Claims 1, 4-19, 21, 22, 24-30, 33-48, 50, 51 and 53-59 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claims 19 and 48 include the limitation of after communicating the password to the master adapter, receive a success message from the master adapter indicating that the password matches a password stored by the master adapter, and in response to receiving the success message, establish a connection between the master adapter and the slave adapter, which is not shown by the prior art of record, in the combination as disclosed and claimed. The Examiner interpreted the claims in light of the Specification and further in view of Applicant's persuasive argument that the proposed *Mowery-Bluetooth Specification* combination fails to disclose such a feature in the amended claims 19 and 48 (pages 18-19 of the Remarks).

Claims 1, 30 and 59 include the limitation of automatically enter an inquiry mode in response to determining that the master adapter has been uncoupled from the peripheral and automatically enter an operational mode in response to determining that the master adapter has been coupled to the peripheral device, which is not shown by the prior art of record, in the combination as disclosed and claimed. The Examiner interpreted the claims in light of the Specification and further in view of Applicant's persuasive argument that the proposed *Mowery-Bluetooth Specification* combination fails to disclose such a feature in the amended claims 1, 30 and 59 (pages 20-22 of the Remarks).

The remaining claims, not specifically mentioned, are allowed for the same reasons above.
